

Fun and Activity Day

Kids have a better attitude about work and are more motivated to do it if we focus more on the value of learning rather than finishing the assignments. Kids are benefited when we have a supportive and positive attitude toward their work. Keeping this in mind a fun filled activity day was being organized for the tiny tots of our school on September 17, 2011. Children of Pre School came decked up like animals. They learnt the sounds and distinctive features of these animals and portrayed them effectively. They enjoyed and had great time learning about these animals through a song.

On the other hand students of Pre Primary had a day with vegetables. They enjoyed Vegetable printing and decorated the plates of salads to satisfy the palate.
